Writing

Time: 40 min.

Share your ideas on the following question:

APART FROM EDUCATION

WHAT SHOULD SCHOOLS OFFER TEENAGERS?

Write a composition of about ***150 - 200*** *words in an appropriate style.* ***Remember*** *to structure your writing carefully:*

- *give an introduction (define the phenomenon of the school's changing role),*
- *express your personal vision of the future changes, describe factors influencing it, support your ideas with convincing arguments and examples,*
- *make a conclusion about the schools and their functions in the future.*

Times go on, everything changes, even schools. Years ago the were not that important, they did not have that influence on pupils' lives. Now a lot of aspects depends on school. For example, communication skills of kids, teenagers' self esteem and wish to study.

And this is not even all the changes that schools got through. I think, schools will continue to change. Maybe in the future there will be subjects that are not uncluded in programme now. The list of lessons may change really hard. And let's not forget about the relations between teachers and students. I guess the level of understanding between them will increase. Students will finally get mentally healthy and comfort atmosphere to educate. All these changes have chance to be because we live in another time. In time of progress and respecting each other.

In conclusion, I want to say that schools' functions

2 - 2 - 1 - 2 - 1 = 7/8.

with no doubt will grow. But only we decide how great and good they will be.
